- 1.1 : Boolean property are now, display as check and cross in tableComplexe AND propertyGroup
- 1.0 : 1st version working

TBD

- More Options

Description

Allow you have option when displaying a tableComplexe(title, size of the table, size and order of column, disable all filter in one click..)

Screen Shot

Options

(to be configure in
C:\Casewise\Evolve\Site\bin\webDesigner\custom\Marketplace\libs\TableComplexeEnhanced\src\TableC

```
  var TableComplexeEnhancedConfig = {
    itemPerPages : [5, 12, 42,9999],
    title : true,
    urlText: "Cliquez Ici",
    openInNewTab: true,
    clearFilterAtStart : true,
    clearButtonName : 'Clear All Filters',
    popOut: true,
    exigence_grid : {
      heightPercent : 2,
      column : {
        1 : {order : 7,size : 200},
        2 : {order : 3,size : 200},
        3 : {order : 2,size : 200},
        7 : {order : 1,size : 400}
      }
    },
    organisation_1624544826 : {
      heightPercent : 2,
      column : {
        1 : {order : 4,size : 100, name: "newname"},
        2 : {order : 1,size : 200},
        4 : {order : 2,size : 200}
      }
    },
    transformation_457481980j: {
      popOutName: "transformation2_diagram_popout"
    }
  };
```

Item Per Pages:

```
itemPerPages : [5, 12, 42,9999],
```
Use the line to configure the number of items per pages. When you ``arrive on the page, the number of item per page will always be 50.

Title:

```
title : true,
```
Put true if you want the title to be display, the title will be the nodeName.

urlText :

Select the text to introduice the link, usually click here

openInNewTab :

If you click on a link it will open it in a new tab

clearFilterAtStart:

```
clearFilterAtStart : true,
```
Put true, if you want the column filter to be cleared at start

clear Button Name:

```
clearButtonName : 'Clear All Filters',
```
Choose the label of the Clear filter button

popOut button:

```
popOut: true
```
Put true if you want to activate popOut button

popOut Name:

By default, the table will try to load the default popout, {objectype}_diagram_popout
But you can specify a popOut by node

```
`transformation_457481980: {
  popOutName: "transformation2_diagram_popout"
}`
```

If your popOut doesn't exist, the button will not be display

Column order, size and label:

You can choose to change the order of the columns, their size and their label for a selected node.

```
    heightPercent : 2,
    column : {
      1 : {order : 7,size : 200,, name: "newname"},
      2 : {order : 3,size : 200},
      3 : {order : 2,size : 200},
      7 : {order : 1,size : 400}
    }
  },
  organisation_1624544826 : {
    heightPercent : 2,
    column : {
      1 : {order : 4,size : 100},
      2 : {order : 1,size : 200},
      4 : {order : 2,size : 200}
    }
  }
```

In this exemple, exigence_grid and organisation_1624544826 are the nodeID of the tableComplexe we want to apply change order

Height of a table complexe:

You can modify the height of a table with heightPercent.

```
    heightPercent : 2,
    column : {
      1 : {order : 4,size : 100},
      2 : {order : 1,size : 200},
      4 : {order : 2,size : 200}
```

```
        }
    }
```

You can modify the height of a table to take for exemple half the size of your page, put heightPercent at 2.

Cohabitation with other specific

Here is a list of all the specific and the function they modified. If you have other personnal specific that use the same function, you will need to merge them in to the main.js
